MODEL BTR.2

Model BTR.2 meets the exacting standard of recording demanded for professional purposes. This equipment is used in "His Master's Voice", Columbia and Parlophone Studios all over the world, and is also installed in many famous broadcasting organisations and Scientific and Industrial Research establishments.

The above illustration of the Studio Console Model BTR.2 shows how completely separate and self-contained units can be quickly and easily removed for servicing or replacement. This method of construction enables individual units to be supplied separately or combined for specialised applications. Overseas enquiries for fully descriptive literature should be addressed to:—

WORLD RADIO HANDBOOK

BROADCASTING-TELEVISION 1956

With the appearance of this edition World Radio Handbook has existed for 10 years. During this period it has evinced its viability and justified its existence. Thanks to the understanding cooperation of the United Nations, Unesco, the European Broadcasting Union Geneva, the International Broadcasting Organization, Prague, numerous broadcasting organizations all over the world, many individuals, radio clubs and radio firms etc. it has been possible to keep pace with the rapid development of both broadcasting and television, and thus enable WRH to fulfil its purpose: to create a practical link between the various broadcasting undertakings themselves and between them and listeners, and thus to make a contribution towards the promotion of world understanding. It is my earnest hope that this cooperation will continue and be extended in the years ahead.

My sincere thanks for the past ten years.

O. LUND JOHANSEN.

UNITED NATIONS:

It is now nearly ten years ago that the first broadcast of the Radio Division of the United Nations went on the air. Originally broadcasting only in the five official languages of the organization: English, French, Spanish, Russian and Chinese, the service soon expanded, and today, programmes in some twentyfive languages from United Nations Headquarters, and from wherever UN activities are taking place.

It soon became clear that the best way of reaching a large listening audience was to ensure that United Nations programmes should be relayed or rebroadcast by national networks. To achieve this, the most complete and accurate information on programmes, transmitters and wavelengths of radio stations all over the world was essential.

There can be no doubt that countless organizations throughout the world share with us the experience that the World Radio Handbook successfully meets this need. The expansion of world broadcasting, and especially the meteoric rise of television in many countries, have made this guide more and more of a necessity for our work.

At the same time, we feel sure that the information on United Nations transmissions, which has appeared each year, has served to make our programmes widely known to our colleagues and to our listeners around the globe.

It is therefore with the greatest pleasure that I extend cordial greetings and congratulations to the World Radio Handbook, and its active Editor, Mr. Lund-Johansen, on the occasion of the tenth anniversary of this invaluable publication.

Peter Aylen

Director, United Nations Radio Division

THE EUROPEAN BROADCASTING UNION IN GENEVA:

On the morrow of a war without precedent in history, great courage and deep faith in the possibilities of reconstruction and development throughout the broadcasting world were needed to create at such a time a publication such as the World Radio Handbook, which aspired to regroup around it men whom, only the eve before, had been engaged in furious combat with each other. - O. Lund-Johansen manifested this same courage and faith, and his joy today at the complete success of his undertaking must be immense. - All of us within the E.B.U. who have known the great difficulties which had to be overcome share this joy with him. First of all because that international audience, necessary to all of us, was able to find in the W.R.H. alone a really effective way to satisfy its universal curiosity; secondly, because for all those operating broadcasting services, the W.R.H. is the most efficient means for making them known throughout the world; and, lastly, because for all those who, together with us, are dedicated to bringing together nations and peoples, the W.R.H. serves as a splendid tool for our daily work. - If this tool has not existed, we should have been forced to create it ourselves. God alone knows - and our friend Lund-Johansen - with what pains! Therefore we believe the best way to express our gratitude and interest in W.R.H. is to assert here that we shall in the future, as we have done in the past, give our most constructive support to the English edition and to any other editions in which it might appear. Broadcasting, itself, quite apart from the great potentialities opened up by television, is far from having reached its zenith. The World Radio Television Handbook has also therefore still before it a life full of promise.

L. Wallenborn, Director.

UNESCO:

A great deal can be said about international understanding and world peace, and perhaps too much has already been said. We can, however, start working towards these objectives without losing time making speeches. We owe much to Mr. O. Lund-Johansen who, ten years ago, took the initiative in rendering practical service to further the idea of world radio. The World Radio Handbook has given valuable information to members of the radio profession who are working for international collaboration. Unesco, whose main concern is to further all fields of education, science and culture is particularly appreciative of the constructive nature of this handbook. We congratulate our esteemed colleague Mr. Lund-Johansen on the success achieved by the World Radio Handbook during its first ten years, and hope that it will continue to develop, as it will be of ever-increasing value to the radio world.

Walter Steigner, Head Radio Division
Dept. of Mass Communication

AMERICA N.

CANADIAN BROADCASTING CORPORATION

Congratulations to World Radio Handbook on the occasion of its tenth anniversary. Its universal coverage of information and its logical manner of presentation have made it a very helpful reference work.

CBC International Service, H. Shane.

VOICE OF AMERICA, UNITED STATES INFORMATION AGENCY:

The entire staff of the Voice of America joins me in congratulating the WORLD RADIO/TELEVISION HANDBOOK on the happy occasion of its tenth anniversary.

I should like to extend to you, Mr. Lund-Johansen, my own personal felicitations for a job well done. The WORLD RADIO/TELEVISION HANDBOOK under your energetic guidance has developed into an international radio and television publication of high reputation.

Your fine contribution to international understanding and goodwill is appreciated by all of us who wish the elimination of barriers to the free exchange of ideas and information.

Our best wishes for your continued success.

Cordially yours,

J.R. Poppele, Director.

**EUROPE
HEALTH, EDUCATION AND WELFARE, OFFICE OF EDUCATION, WASHINGTON:**

We consider the World Radio Handbook a very valuable addition to the promotion of international understanding through communications and are happy to know that you are publishing your 10th Anniversary Edition on the first of December 1955. We hope too, that your book will stimulate the extension of the Eurovision idea so that it may embrace all the Continents of the world. This can easily be accomplished by means of kinescoped copies of programs even before microwave stations are set up to bring this about. We congratulate Mr. O. Lund-Johansen on his enterprise and his devotion to the cause of international communications and take pride in the fact that DENMARK has been honored as the place where this service has been established.

Franklin Dunham, Chief of Radio-Television.

THE BELGIAN NATIONAL BROADCASTING SERVICE:

WRH is ten years old. One must be connected with the direction of a big transmitting station—as I have been for eleven years—in order to be able to appreciate the importance of this annual publication for international documentation to which one daily must resort.

Mr. Lund Johansen should be congratulated—and warmly congratulated—for having realised that a reference work of this nature should be a source of pleasure to consult, and not a repellant administrative year book, the use of which induces melancholy.

Mr. Lund Johansen has wished to present his work to us each year in an attractive form, and has insisted on a mass of illustrations, which are not only a pleasure to the eye, but also continue the information to be found in the text.

Such ideas have resulted in the production of a manual, carefully kept up to date, in which is a mass of information so ingeniously grouped that it is of interest not only to the heads of broadcasting stations, but also to the large public that wishes to extend its knowledge of world broadcasting activities.

And now television opens a fresh field of operation for the publisher of WRTH, and thus the possibility once more to perform important services to international understanding.

For all these reasons it gives us great pleasure warmly to congratulate Mr. O. Lund Johansen and those, who assist him in his work now that World Radio Television Handbook celebrates its tenth edition.

André Guery,

Director of Public Relations and of "Micro-Magazine".

THE BRITISH BROADCASTING CORPORATION:

"NATION SHALL SPEAK PEACE UNTO NATION" is the motto under which the British Broadcasting Corporation addresses listeners throughout the world in forty-four languages. In offering radio listeners, wherever they may be, information about the world's radio output, Mr. Lund Johansen has affirmed his belief in the task of international broadcasting to bring about better understanding between the peoples of the world.

I join my colleagues in radio organizations on the five continents in congratulating Mr. Lund Johansen on the tenth anniversary of World Radio Handbook and wishing him every success in the future.

Sir Harold Bishop, C.B.E.,

Director of Technical Services
of the British Broadcasting Corporation

THE DANISH STATE BROADCAST, DENMARK:

World Radio Handbook contains such a wealth of facts that one never turns to it in vain when seeking information about radio matters in the various countries.

It can be seen that the editor has spared no effort to make each edition as complete and up to date as possible. The handbook has therefore become a useful implement for radio enthusiasts, and has made its contribution towards the development of international cooperation.

Peder Nørgaard.

President of the Radio Council.

THE DANISH STATE BROADCAST, DENMARK:

World Radio Handbook has now existed for 10 years; 10 years in which a tremendous work has been performed to create and develop a manual which would meet every reasonable demand in its field. A jubilee edition is now available, fully up to date, which contains a long list of information invaluable to the foreign listeners. Fortunately, there are a great many of them in the world. — Listening in to foreign stations is an excellent thing. It promotes understanding between nations, and helps to reduce language difficulties. — It is a pleasant thought, therefore, that the handbook is becoming more and more widespread, and I trust that this jubilee edition will prove to be a big step towards the final goal:

— World Radio Television Handbook on every foreign listener's table.

F.E.Jensen, Director General

THE NATIONAL BROADCASTING INSTITUTE, GREECE:

The "World Radio Handbook" is an important work, indispensable for world promotion of Radio art and expansion of Television. It should be of interest to all countries wishing to perfect their broadcasting system aiming at further developing the possibilities of contact among listeners throughout the world. — The ends of the "World Radio Handbook" would be even more complete, if special articles about "the rights of peoples" selfdisposal and claim for justice" were included in this valuable publication.

Je Bettos, Director General.

NORSK RIKSKRINGKASTING, NORWAY:

In the course of the relatively short period in which broadcasting has existed, we have experienced a development of which no one who was present at the very modest start could have had an idea. In order to be able fully to exploit this wonderful means of communication, it is absolutely necessary to be aware of the technical data and broadcasting hours of the various transmitting stations. This applies particularly to short wave stations.

In the course of the ten years WRH has existed, it has, on account of its thorough and reliable information, worked itself up into an indispensable reference book for every interested listener. — We congratulate Mr. O. Lund Johansen on this international encyclopaedia of world broadcasting and we hope that the work may further develop into the leading international publication it aims to be.

Gunnar Nygaard, Chief of Short Wave Dept.

RADIODIFFUSION TELEVISION FRANCAISE, FRANCE:

World Radio Handbook has the great advantage of containing a very complete collection of interesting broadcasting information periodically arranged. It is a very valuable manual for the professional to consult and allows listeners to learn in detail the enormous possibilities offered by this means of communication in all parts of the world.

M. Bonami

Le Chef du Service des Affaires Générales

RADIO-TELEVISIONE ITALIANA, ITALY:

Happy to express heartiest congratulations for tenth anniversary WRH and would like to express greatest appreciation for an excellent and useful publication, to which we send best heartfelt wishes for ever growing success.

Zaffrani, Director Foreign Relations.

RADIO ROMA, ITALY:

On the occasion of the publication of the tenth anniversary edition of the "World Radio Handbook" I am happy to express to you my best congratulations for this interesting publication and for your activities on its behalf through the past 10 years in order to divulgate the broadcasting services throughout the world.

With my best regards and wishes for a brilliant future of "World Radio Handbook".

Dr. Gilberto Bernabei

Director of SW Broadcasting Service

RADIO NACIONAL DE ESPANA, SPAIN:

In the course of recent years WRH has become a book to which I constantly refer. Thanks to it I know in a moment not only the broadcasts from any wireless station in any country, but also the names of the leading personalities with whom I must get in touch in my daily work as director for a transmitting station.

At the same time this valuable publication causes our own organization to be known abroad, and enables us to receive, not anonymously but in our own name, the letters, proposals and offers, which permit us to maintain a world-wide connexion in the field of television and radio. In my opinion no director of a station of any size can manage without WRH.

In regard to my ideas about the development of radio and television during the past ten years, it seems to me difficult to return a precise and concrete reply. The constant progress made by technique has caused the world to be engrossed by television, yet, despite this, the radio has continued its own existence, and far from losing listeners has actually gained them. Consequently, in my view, both these methods of communication and association must develop concurrently, so that in the not too distant future a large part of human knowledge will be based on scenic and phonetic impressions, and not merely—as was the case a few decades ago—on written texts. The Renaissance of the spoken word will be of very great importance to human culture. The film, the radio, and television are the modern means of expression. They more than anything else will influence the people of tomorrow, as they will not only be the agents of understanding between the peoples but also will disseminate the various cultures between nations.

D. José-Ramon Alonso, Director-General.

THE LATEST NEWS: The W. R.-BULLETIN carries every fortnight the latest news from broadcasting stations all over the world. New stations, frequencies, powers, schedules etc. Corrections to the **WORLD RADIO HAND-**

BOOK. — Subscription rates: By airmail: Dan. Kr. 35.00, \$ 5.50, £ 2/-, DM. 22.00. Quarterly: Dan. Kr. 10.00 \$ 1.25, £ 0/10/-, DM. 6.00. By ordinary mail annually: Dan. Kr. 21.00, \$ 3.50, £ 0/21/0, DM. 15.00. Quarterly: Dan. Kr. 5.50, £ 0/5/6, \$ 1.25, DM. 4.00

A quality link between

In all corners of the globe many people will be listening to broadcasts that come to them via the loudspeaker of their Philips radio set. From the purity of the sound and the excellent selectivity they will realize that everything possible is done in the Philips factories and laboratories to attain the highest quality of reception.

Q202

Real radio enjoyment, however, is not only dependent upon the quality of the receiving set. The broadcasting stations have to give careful thought to the composition of their programmes.

Much time and money is taken up by the selection of good talent and last but not least the technical equipment has to be in perfect condition.

PHILIPS *for dependable*

speaker and speaker

Also at this end of the „bridge“ between the listener and the studio Philips play an important part.

Just as they make many types of Philips radioplayers, they manufacture quite a range of different studio equipment and transmitters ranging from 50 watts to 100 kilowatts and comprising types for different wavelengths and modes of modulation. Also in the field of television Philips equipment forms a quality link between camera and screen.

By producing quality equipment for both the broadcasting stations and the home, Philips contribute their share towards better radio and T.V. reception thus building a link of understanding between people of many nationalities.

transmission and reception

HOW TO USE WORLD RADIO HANDBOOK

The practical information given in the following section in respect of the broadcasting services of each individual country includes:

The Addresses of the broadcasting companies in question. Where broadcasts are commercial this is stated. **Names and Titles** of the leading personalities in each company.

List of Stations operated by each company with call signs of their transmitters, all frequencies and wavelengths (medium- and shortwaves), as well as their power expressed in kilowatts or watts.

Each short-wave station has its own identification call sign consisting of 3-5 letters or a combination of letters and figures of which the first, or two first, denote the nationality in accordance with the international list of station prefixes. (See page 26.) Some short-wave stations, the American ones for example, use these call-signs when announcing themselves.

Long and medium wave stations are divided into three categories, viz. (1) **Main Stations**, which are so powerful that they can generally be heard throughout the whole area of the country in question, and from which most of the broadcasts emanate; (2) **Regional Stations**, which can be heard only within a certain area of the country, and whose broadcasts consist partly of re-transmissions of the programmes of the main stations and partly of their own programmes; (3) **Relay and Local Stations**, which mostly re-transmit main station programmes. These relay stations are the weakest, and are local stations which can be heard only within a limited area; The above-mentioned stations are all **AM stations**, i.e. amplitude-modulated stations. In addition, there is a fourth category of station: 4) **FM stations**, i.e. frequency modulated stations, in order to give listeners a reception free of interference. These stations have only a very short radius, and are consequently local stations.

Most short wave stations use directional aerials, i.e. their broadcasts are directed toward particular areas, and these give the names to the various services: European Service, Near Eastern, Middle Eastern, Far Eastern, Pacific, Latin-American, Caribbean Service, etc. Language and frequency employed vary according to the area to which broadcasts are directed.

Times are shown on the 24 hours system. In this system midnight is 00.00 hrs., 3 am: 03.00 hrs., 10 am: 10.00 hrs. and midday 12.00 hrs. Instead of starting again at 1 o'clock, as the 12-hour system does, the 24-hour system continues to increase the number of each hour until 23.59 (11.59 pm.) is reached. Thus 13 hrs. is 1 pm., 17.00 hrs. 5 pm. and so on. The great advantage of the system is that it eliminates any possible confusion between times a.m. and times p.m.

On page 18 you will find a Local Time Conversion Table which gives the local times (summer and winter) in most parts of the world in relation to Greenwich Mean Time (G.M.T.). For example, from September to May it is 15.00 hours New York time when it is 20.00 hours G.M.T., since the table indicates that local time in New York is 5 hours ahead of G.M.T. From May to September U.S.A. introduces day-light saving time and, consequently, it is 16.00 hours New York time when it is 20.00 hours G.M.T.

Frequency and wavelength. Frequency and Wavelength are divided into the following groups: **Long waves**, **medium waves**, **short waves** and **ultra short waves** (V. H. F. - very high frequencies-FM).

The wavelength of a station is measured in metres, and kilocycles per second (kc/s); for FM-stations in megacycles per second (mc/s). A kilocycle is 1000 cycles; a megacycle 1.000.000 cycles.

Shortwave broadcasting takes place mainly on the following metre bands (m.b.):

49 metre band - 41 metre band - 31 metre band - 25 metre band - 19 metre band - 16 metre band - 13 metre band and 11 metre band.

Many short-wave stations lie outside these bands. The 60 and 80 metre bands are used for local broadcasting, i.e. for reception over relatively short distances, which applies, for example, to many South and Central American stations and stations in Central Africa.

In the following pages you will find a large variety of call-signs and frequencies. In many cases these belong to the same transmitters which are connected to different aerials designed to radiate signals to the best advantage in respect of each service. The various call-signs serve to identify individual transmissions.

Many programmes are broadcast simultaneously from several transmitters on different frequencies, which enables you to select the one which is the most clearly audible in your area or on your particular receiver. If reception on one of the frequencies used is poor, you should examine reception conditions on the other frequencies employed by the same station. On page 31 you will find a table of the most suitable metre bands for best short-wave reception in every part of the world at various times of the day throughout the year 1956.

Daily Programmes: Under this heading you will find information concerning the total broadcasting hours on the different frequencies employed during transmission hours, as well as a survey of the news.

Announcements: The language alone is not a conclusive indication of the origin of a broadcast to which you may be listening. Hearing a programme in French or Spanish, for instance, does not necessarily mean that it is transmitted by a French or Spanish station respectively. To make sure of identifying a station correctly, it is, therefore, essential to wait for the announcement which every station broadcasts at regular intervals. These call signs are given in this book for practically all the stations listed.

Interval-Signals: For identifying stations it is also of importance to know the signals used during the intervals between programme items. Under each station you will, therefore, find a indication of the type of signal used, and in many cases a reproduction of the musical notes of this signal.

ROCKE INTERNATIONAL CORPORATION
13 East 40th Street, New York 16, N. Y., U.S.A. Cables: ARLAB

A Norwegian floating factory in the Antarctic Ocean.

NORWAY

– a country of scenic beauty and great contrasts – of narrow valleys and deep fiords, of high mountains and thousands of islands.

The distance in a straight line from North Cape, at 57° 11' north to Norway's southernmost point measures more than 1100 miles. Due to the Gulf Stream Norway enjoys a temperate climate, even the regions that lie farther north than for instance Cape Barrow in Alaska. The area, somewhat larger than Great Britain and Ireland, comprises 124.710 square miles, with a population of less than three and a half million people. The mountainous character of the country and its coastline of 12.500 miles explain why a large percentage of the population lives in close contact with the sea. To-day Norway's merchant fleet ranks third in the world. Her ships are manned by 40.000 seamen, and in addition about 20.000 fishermen, sealers and whalers seek their living in distant waters.

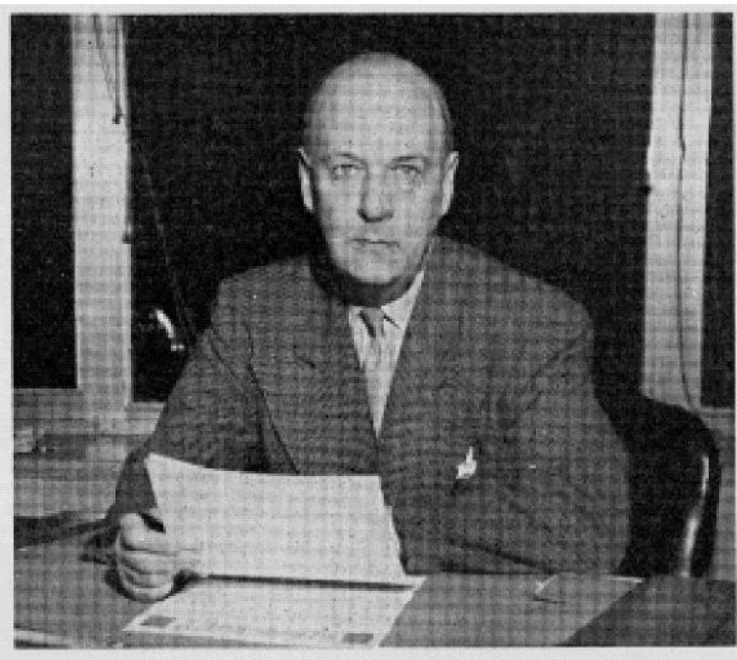

Besides, more than 4 million people of Norwegian descent have settled abroad, most of them in the United States.

The Short Wave Division of Radio Norway tries to keep Norwegians wherever they are, in contact with their country, informing them of current events and presenting various aspects of life at home.

We should like to draw the attention of our English speaking listeners to our Sunday transmissions in English, so for information about Norway try and listen in to

Norway this Week.

(For programme details see page 62).

SOUND BROADCASTING AND TELEVISION

**are twin forces
of great importance
in the peace of the
world**

Peter Aylen
Director Radio Division

We believe that the story of the United Nations and its efforts to secure peace is a story worth telling, worth listening to. The larger the audience which hears it, the wider the area of the world in which it is understood, the easier the great task of making a peaceful and prosperous world becomes.

From the earliest days of its existence, the United Nations has placed considerable emphasis on the use of radio and television to reach as large a segment of the world's population as possible. These media are remarkably effective instruments for conveying fact and creating understanding.

It follows therefore that we in the United Nations must be sensitive to the pattern of change and development in the radio and television industries of all countries.

The world of international broadcasting and television is a dynamic one and in this tenth United Nations year, it has been in the process of considerable change.

It seemed at first that television service would be long restricted to a few areas of high population density and economic affluence; but in the last few years, resources have grown; news services have opened in a dozen countries and existing television systems have expanded their installations; the number of viewers has increased by millions.

Equally important from the United Nations point of view is the fact that Television is becoming increasingly *international* in character; programmes are regularly exchanged between television organizations. This may lead to a growing open-mindedness, a willingness to see "how the other man does it", which can do nothing but good in the long run. Particularly noteworthy in this sense is the Eurovision system which gives the individual European television organizations an open window on broad international horizons.

Let this not be taken to mean that international sound broadcasting is a spent force. One need only compare the number of listings in the current edition of this most valuable guide to the details given in, say the 1952 edition, to see that radio broadcasting remains a growing force, and that each year it serves new and growing audiences. It is true that the requirements of television have caused some of the larger international broadcasting organizations to reduce their resources; but against that we must weigh the fact that broadcasting services are now being started in several areas which have not previously had them, and that much existing plant is being expanded.

Sound broadcasting and television are twin forces of great importance in the peace of the world; let us hope that they will be used wisely in the cause common to us all.

How to use the WRH, continued from page X.

QSL-Cards. As indicated in the survey of the broadcasting services of the various countries, many of the stations listed are interested in receiving reports from listeners in respect of their transmissions. These stations acknowledge reports by sending listeners a QSL- (verification) card or a letter. For most of these stations it is stated whether reports are answered by QSL card or letter and if return postage is required. Many short-wave listeners make a hobby of collecting these QSL-cards which are often elaborately designed and colourful.

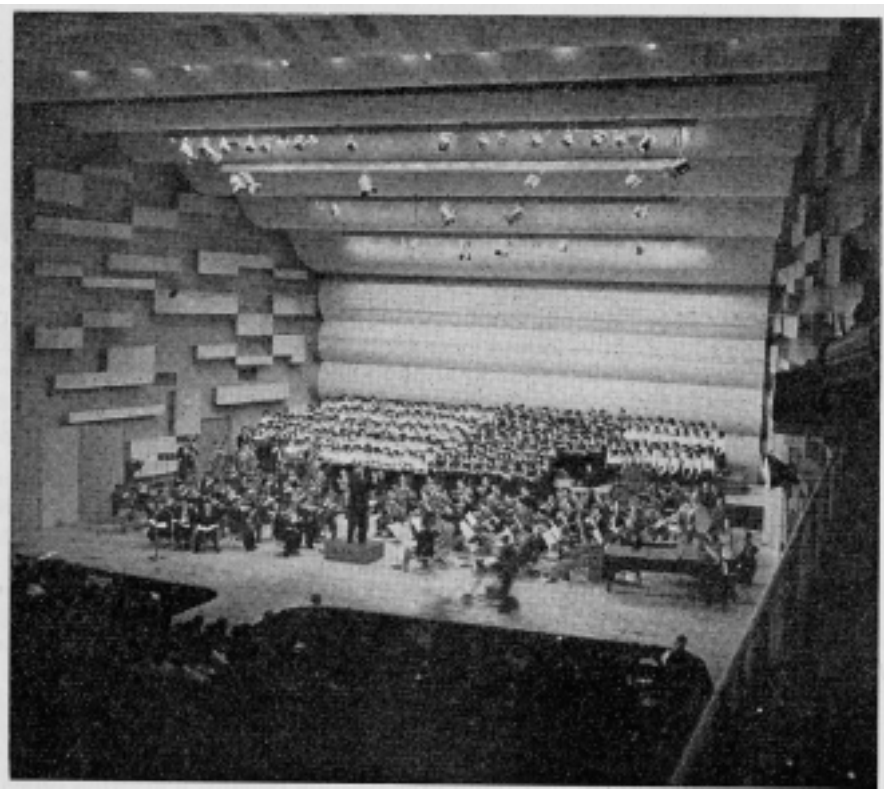

Reports from Listeners: Listeners' reports can in most cases be written in English, but Spanish is preferable when writing to South or Central American stations.

If reply postage is requested by a station, enclose with your reports an International Reply Coupon obtainable at most post offices. The full address of each station will be found in the individual surveys.

Radio Japan

Radio Japan conducts an international broadcasting service directed to various regions of the world with the object of introducing a factual and accurate picture of contemporary Japan. These shortwave broadcasts are directed to the 13 regions.

Senders of reception reports will receive in return verification cards and pamphlets. (Full details of the operation of the shortwave service are given on Page 98.)

NIPPON HOSO KYOKAI
(Japan Broadcasting Corporation)
No. 2, 2-chome, Uchisaiwai-cho,
Chiyoda-ku, Tokyo, Japan

Radio Japan is the name of the shortwave external services of the Nippon Hoso Kyokai (NHK) which conducts domestic service by medium waves, as well as a television service. The domestic service has two nation-wide networks comprising 95 stations for the 1st network and 72 stations for the 2nd network. As of the present, NHK's Television service comprises 3 stations, which will be augmented, in the near future, by 3 additional stations.

Messages to the WHR on the occasion of its tenth anniversary.

(Continued from page 5):

SOCIEDAD ESPANOLA DE RADIODIFUSION, SPAIN

WORLD RADIO HANDBOOK'S noble efforts to create understanding between the peoples of the world are approaching its target with the publication of its tenth Edition, in the pages of which it is possible to satisfy any question concerning international broadcasting thanks to its handy arrangement, which shows the development and practice of these world transmissions, and the precise and methodical presentation of interesting and valuable data, which, from a professional point of view, provides a basis for the work.

In congratulating Mr. Lund Johansen, we express the wish that in the general interest, he will complete his success by allowing space in his text for the increasing television transmissions and thus enlarge the scope of his editions in the Spanish language.

Virgilio Oñate, Director-General.

SWISS BROADCASTING CORPORATION, SWITZERLAND:

"What is your opinion about the work of the World Radio Handbook and its international value through the past ten years?" That is the question Mr. O. Lund-Johansen, its meritorious editor, asks on the occasion of the tenth anniversary of this publication. The answer is readily given. I am convinced that there is hardly any radio man who does not keep the latest edition of W.R.H. on his desk or in his reference library as a most precious tool which he makes use of most frequently. I can indeed hardly imagine how we could do without this indispensable booklet anymore. Trusting that the W.R.H. will continue to be a faithful companion in our daily work, I send you my very best wishes for its 10th anniversary.

Marcel Bezençon, Director General of
Swiss Broadcasting Corporation

Cie THOMSON-HOUSTON, FRANCE

The Electron Group of Compagnie Francaise Thomson-Houston is happy to be able to congratulate the publisher of World Radio Handbook, the aim of which is to promote hearty understanding between the nations of the world and the documentary value of which it has appreciated annually. WRH is both a working implement and a free-time instrument for all who for various reasons are engaged in broadcasting and television. World technical development is such that it is no longer sufficient to be interested simply for the pleasure provided

by radio or television set in the home, one must also consider the efforts made in France and other countries to extend their installations and to enlarge their programmes.

There is no doubt that WRH is a most valuable professional bearer of a message to the whole world. It represents in particular to Compagnie Francaise Thomson-Houston, which is the oldest of the French radio-electric Compagnies—not only a valuable advertising medium, but is also an ideal carrier of technical information which is predestined to promote the economic expansion, that is necessary for the peaceful development of international relations.

J. J. Bauzin, Director-General.

ÖSTERREICHISCHER RUNDFUNK, AUSTRIA

World Radio Handbook has not only proved to be a valuable source of information for experts and radio enthusiasts all over the world, but has also brought many closer together. We therefore wish to combine our congratulations on the tenth anniversary of World Radio Handbook with the hope that it will succeed in continuing to be the friend and helper of people who work for and interest themselves in a joint cause.

Dipl. Ing. Wilhelm Fuchsl, Director General.

AFRICA.

SOUTH AFRICAN BROADCASTING CORPORATION

In congratulating Mr. Lund-Johansen on the 10th Anniversary Edition of the World Radio Handbook, we rejoice with him that his faith has been vindicated by the success which the Handbook has undoubtedly proved to be during the past 10 years. We in the S.A.B.C. have found it a useful reference work, and we should like to join our colleagues of other Broadcasting Organizations in many countries in wishing Mr. Lund-Johansen a bright and successful future for his publication.

Gideon Roos, Director-General

EAST.

AUSTRALIAN BROADCASTING COMMISSION

"The World Radio Handbook is an accurate and up-to-date record of the operations of radio stations throughout the world. As such it is of the greatest value to broadcasters and listeners. We wish it continued success".

E.K. Shoil, Controller of Administration.

(Continued page 167)

INTERNATIONAL SERVICE
RADIO-CANADA
SERVICE INTERNATIONAL

Shortwave listeners, are invited to tune in on broadcasts from Canada. Full coverage is given to Canadian and world-wide news and Canadian thinking on current affairs. Programs also include actuality reports on national events, press opinion and music. We welcome correspondence about programs and reception, and reply by letter or by QSL card.

Illustrated Program Schedule is sent free on request.

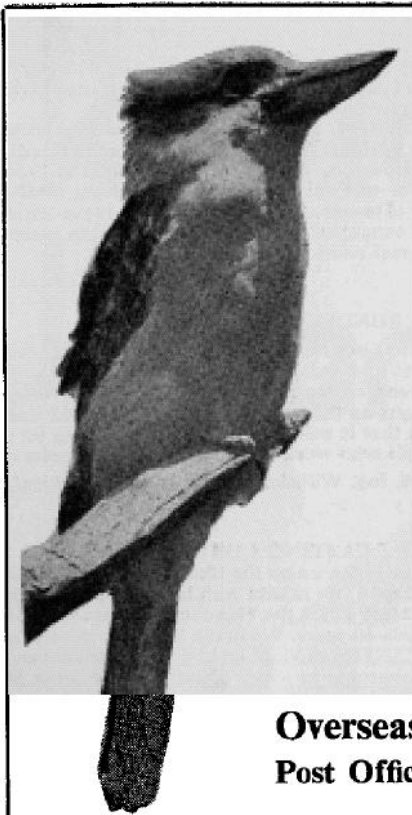

*Recorded programs in the English, French and Spanish
languages are available to radio organizations.*

A message from

UNESCO

A broadcaster who leaves his own country to go abroad will always receive a hearty welcome from foreign colleagues. Being members of the same profession is a binding factor; one knows that in all technical and programming questions there is a certain interdependence. And so we might speak of a fellowship of international radio workers which embraces all continents. Colleagues who have travelled can confirm this from their own experience.

This fact facilitates the work of Unesco's Radio Division, for all broadcasters are ready and willing to collaborate with their colleagues on an international scale. We can take as an example the organizational feats involved when radio commentaries on the Olympic Games are transmitted simultaneously in all languages on all cables and wave lengths of the world.

Unesco's great task is to further education, science and culture throughout the world; radio is one of the means to this end and with this in view, Unesco's radio division endeavours to help, with advice and deeds, all those working in this field.

The task is difficult in so far as it is universal. Many radio stations are glad to broadcast Unesco programmes which are sent to them direct from Paris on tape or disc. Other radio stations would rather «blow up» their transmitters than use a pre-fabricated programme not made in their own studios! Again, there are many programme producers who take the trouble to study Unesco's script programmes and other manuscripts and use extracts from this material in their own programmes or who translate it into their languages. Others have the highly unpleasant habit of putting unopened letters straight into the waste paper basket. It is not possible to put the many different radio stations, governmental, independent and commercial, under one heading.

However important it has been in the past and will remain to supply radio organizations with Unesco material in the form of programmes and scripts, in the future special emphasis will be laid on closer contacts with colleagues working on educational, scientific and cultural programmes of their own. Unesco may help them with «raw» material on the international aspects of their problems.

Perhaps we can help them and their collaborates with programme themes chosen from the world-wide field of Unesco activities just as we would appreciate receiving suggestions from colleagues engaged in practical radio work. Every radio author and feature writer is invited to choose from the numerous themes Unesco can offer. Let us think, for example, of the underdeveloped countries which, in this new atomic era, are finding new hope that they may overcome poverty. Let us think of the fact that more than half the world's population can neither read nor write. Let us think, above all, of all international organizations' greatest task: to further international understanding, particularly in this atomic age.....

Unesco Headquarters sends out many experts in the fields of education, science and culture. They go into the desert to examine arid zone conditions, they go into forgotten villages to teach children, they go to scientific institutes to make knowledge and experience of one country's research workers available to those of other countries. These men, if one may use a military image, are on the battlefield of war against poverty, ignorance, racial prejudices and enmity.

These many experts, after years of work in the field, have much to report; if radio organizations were prepared to give even more time on the air to this work and these workers, they would make an important contribution not only to Unesco's task, but to general progress.

For these reasons, Unesco's Radio Division is anxious to collaborate fruitfully with all radio organizations gathered in this World Radio Handbook and tighten already existing contacts.

WALTER STEIGNER

Chief, Radio Division

VED AMAGERBANEN 21 - COPENHAGEN 5 - DENMARK

EDDYSTONE

MODEL '840A'

AC/DC COMMUNICATIONS RECEIVER

The new model '840A' illustrated above, possesses full Communication facilities and operates from either A.C. or D.C. mains 100/110 and 220/250 volts.

- Seven valve superheterodyne with R.F. stage.
- Frequency coverage 30 Mc/s. to 480 kc/s.
- Clear, accurately calibrated horizontal tuning scales.
- Gear driven tuning with 140/1 reduction.
- Mechanical bandspread. Accurate re-setting.
- B.F.O. and noise limiter.
- Internal loud-speaker. Headphones jack.
- Robust diecast construction. Rustproofed steel case.
- Suitable for tropical service.
- Weight 30 lbs. Size 16 $\frac{3}{4}$ " x 10 $\frac{1}{2}$ " x 8 $\frac{3}{4}$ " high.

List Price (in U.K.) £49

BROADCASTING

EQUIPMENT

GATES

A full line of AM & FM broadcasting, television transmitters from 250 watts to 50 kw.

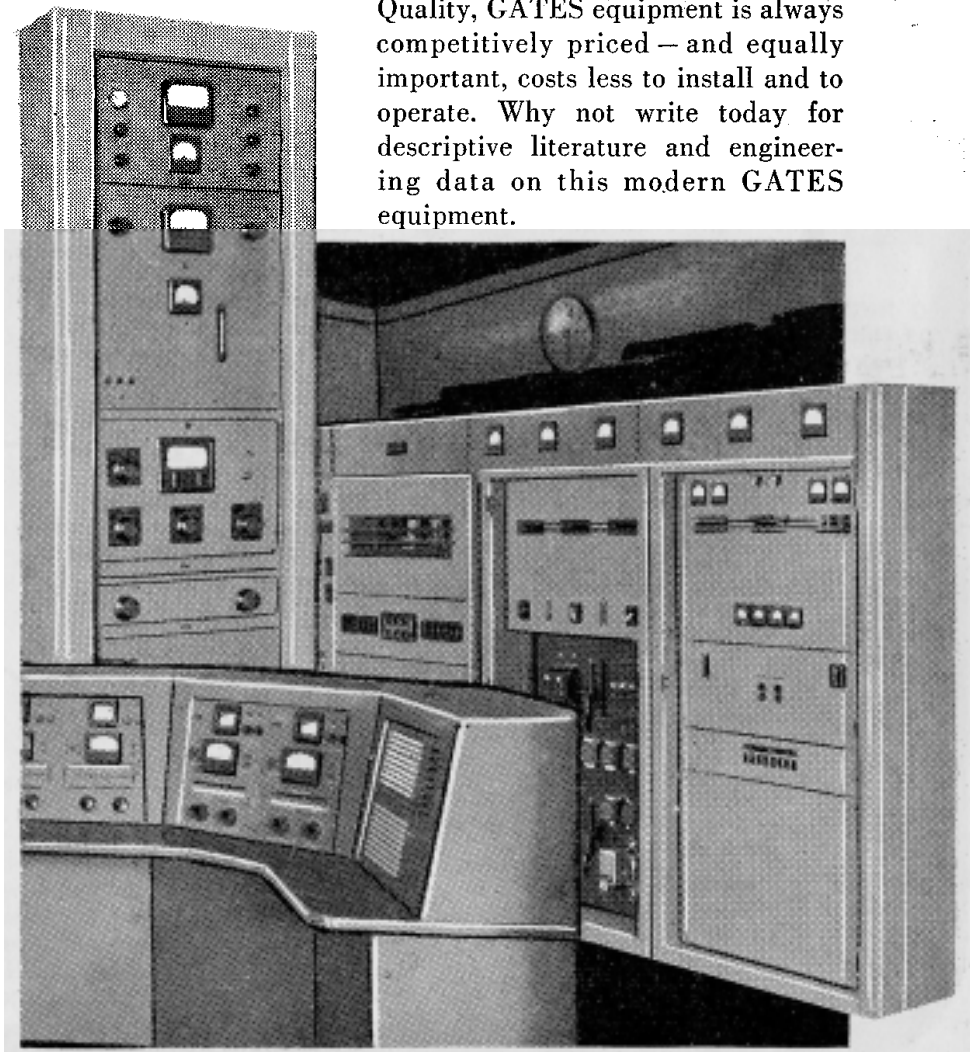

Single or Multi-Channel Communications Transmitters.

Speech Input Equipment • Transmitter Control Consoles • Master Control Consoles • Speech Input Console • Plug-In Pre-amplifiers • General Purpose Consoles • Transcription Turntables • Mobile Sound Effects Console.

Remote Amplifier Equipment • Directional Phasing Equipment • Monitoring Equipment • Oscillators • Remote Control Equipment.

**Manufacturing
Engineers
Since 1922**

GATES is the largest supplier of AM radio broadcasting equipment in the U.S.A. The prime reason for GATES' popularity everywhere, is that while maintaining the highest standards of Quality, GATES equipment is always competitively priced — and equally important, costs less to install and to operate. Why not write today for descriptive literature and engineering data on this modern GATES equipment.

GATES RADIO COMPANY

INTERNATIONAL DIVISION

13 East 40th Street, New York 16, N. Y., U.S.A. Cables: ARLAB

FRAZAR & HANSEN Ltd.

presents the latest

Frazar & Hansen Ltd. is privileged to serve as the export representative of more than 40 leading manufacturers of electronic and allied equipment designed for amateur, professional, airborne and military applications. Inquiries are invited from importers, distributors, dealers and end users and from manufacturers in industries employing electronic devices and processes. Technical and engineering services for research and development.

ALTO SCIENTIFIC CO.

Electronic test equipment and developmental research.

AMELCO, INC.

Universal continuity meter, design and development.

AREMAC ASSOCIATES

Recording oscilloscope cameras and associated equipment.

BABCOCK RADIO ENGINEERING CO.

Mobile transmitters and radio control equipment.

CINEMA ENG. CO.

Audio equipment for recording, broadcasting and motion pictures.

COLOR TELEVISION, INC.

Circuit analyzers, microwave instrumentation and special products.

DETECTRON CORP.

Decade instrumentation, and counters; radiation and metal detectors.

ELECTROCIRCUITS, INC.

Ultrasonic test inspection equipment and accessories.

FREQUENCY STANDARDS, INC.

Microwave frequency meters, cavities and special products.

McKENNA LABORATORIES

Ultrasonic generators for cleaning, chemical and other applications

WM. MILLER INSTRUMENTS, INC.

Recording and cathode ray oscillographs and system components

NON-LINEAR SYSTEMS, INC.

Precision digital voltmeters and data recording systems.

RESEDL ENG. CORP.

Dielectric heaters, transponders, and doppler velocimeters

ROBINSON & CO.

Radio direction finders and receivers for small vessels.

RUTHERFORD ELECTRONICS CO.

Pulse and time delay generators for radar calibration and research

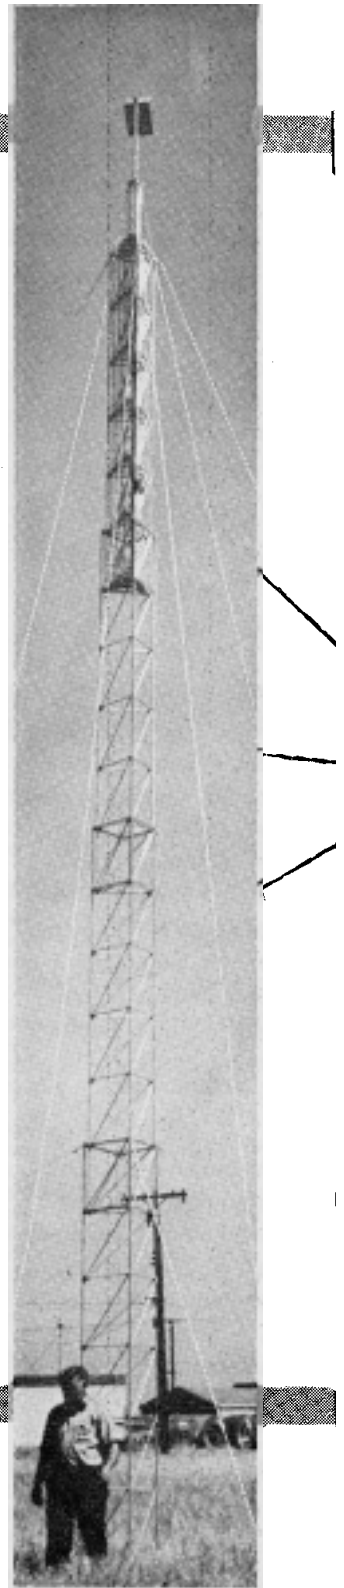

UNIVERSAL ELECTRONICS CO.

Precision regulated power supplies for laboratories and industry.

Aluminum Antenna Towers

Fixed towers 12 to 1200 feet. Strength and rigidity of steel, only one-quarter the weight and costs less. *Crank-up towers*, six sizes 36 to 146 ft. Withstand winds to 100 MPH.

ALPAR MFG. CORP.

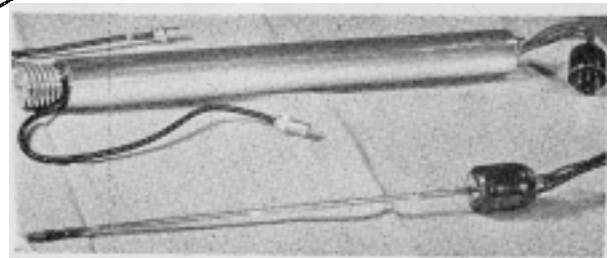

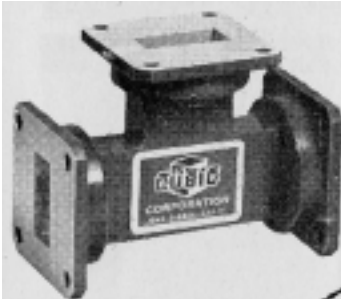

ADVANCEMENTS IN ELECTRONICS

Microwave Components and Systems

Complete range of microwave components from 1.12KMC to 40.00KMC standing wave amplifiers, klystron power supplies, VSWR meters, calorimetric wattmeters, microwave peakpower test sets and precision phase meters.

CUBIC CORP.

Traveling Wave Tube

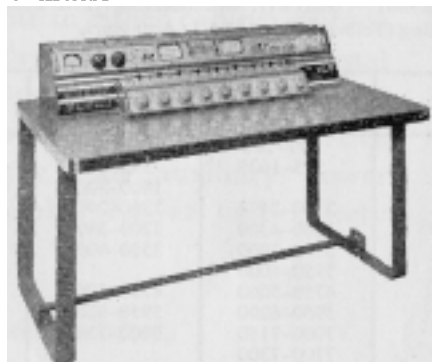

Broadband microwave tube; high gain, moderate output power, low noise. Also backward wave oscillators; microwave gas control tubes, packaged microwave amplifiers; ion gauge control units; broadband microwave sweep generators; microwave absorption attenuators, etc.

ROGER WHITE ELECTRON DEVICES, INC.

Speech Input Consoles

For large or small broadcast stations; portables. Self-contained. All models meet stringent requirements. Complete line of microphones and loudspeakers. High fidelity home music systems. Theater sound systems.

ALTEC LANSING CORPORATION

Test Equipment

For laboratories, production monitoring, carrier systems, utilities. New bi-directional power model illustrated simplifies measurement of incident or reflected power speeds, matching load to line. Ideal for portable and laboratory applications.

SIERRA ELECTRONIC CORP.

The MAGNEMITE

BATTERY-OPERATED SPRING-MOTOR TAPE RECORDER

Favorite of the World's Outstanding Broadcasting Stations and Recording Studios!

VU Magnemite

4-Speed Magnemite

Engineered and developed by pioneers of battery-powered, self-contained recording equipment characterized by complete independence from outside sources of power. Tapes recorded 'on the spot' with these units will faultlessly play back on all professional and standard recorders. Features found in heavy studio consoles have been incorporated so that high quality recording is made possible even under the most gruelling field conditions.

Extreme simplicity of design and elimination of troublesome and unnecessary non-portable features have made possible a really maintenance-free, foolproof, easy-to-operate, light-weight, compact recorder. These properties plus versatility and dependable performance have earned international acceptance for the Magnemite. 50 Diversified models available for every conceivable application. For complete technical specifications and direct factory prices write to Dept. WR:

The Editor of the World Radio Handbook seeks information from all stations engaged in broadcasting and interested in international broadcasting and publish the information as they communicated to him by the stations. The Editor cannot be held responsible for the correctness of these information or for the not publishing schedules and other particulars of stations, which do not supply the information or for changes in the times and wavelengths of programmes made after the current edition has gone to press.

An outstanding general purpose communication receiver

G.E.C.

BRT 400D

Justly acclaimed as Britain's finest communication receiver the BRT 400D is in widespread use by Military, Post and Telegraph and Broadcasting authorities throughout the world.

Combining first-class performance with a wide range of facilities, the BRT 400D is equally suitable for both narrow-band telegraphy and wide-band telephony

reception — with a very high standard of reliability.

It is available in either cabinet or rack mounting form, with a 500 kc/s crystal calibration unit as an optional extra. Normal operation is from an A.C. mains supply: an auxiliary power unit is available for 12 volt battery operation.

For the full specification please send for a copy of publication BC2084.

THE GENERAL ELECTRIC CO. LTD. OF ENGLAND

Head Office: Magnet House, Kingsway, London, W.C.2

Table of allocation of call signs

The first character or the first two characters of a call sign indicates the nationality of the station using it.

WORLD'S FAVORITE MAGNETIC RECORDING TAPES!

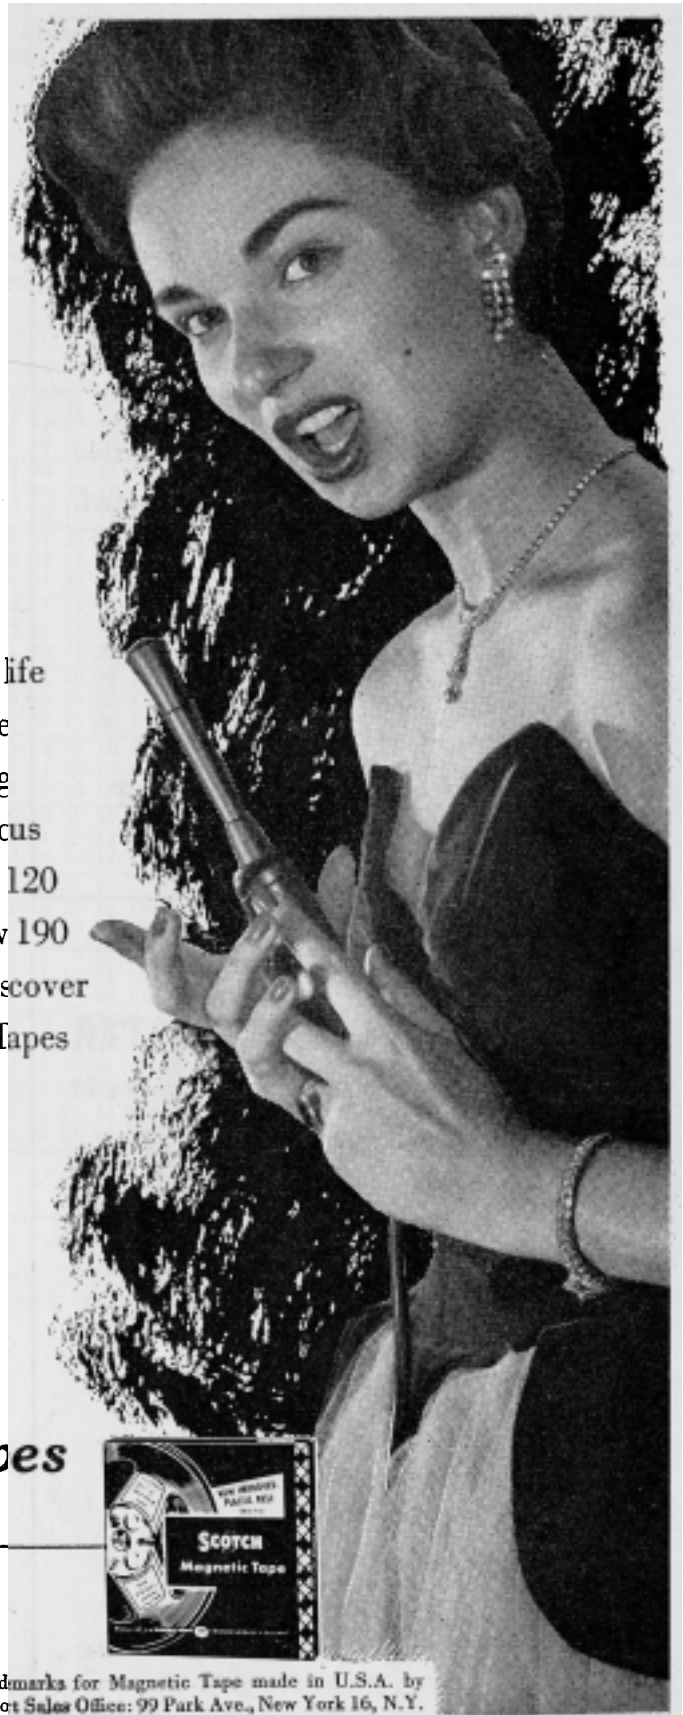

Concert artists . . . symphony orchestras . . .
distant foreign stations . . . they all come to life
again with amazing fidelity when you preserve
them on "SCOTCH" Brand Magnetic Recording
Tapes. A complete line to choose from: famous
111 Tape for low-cost recordings . . . brilliant 120
High Output Tape for highest fidelity . . . new 190
Extra Play Tape for added recording time. Discover
for yourself why "SCOTCH" Brand Magnetic Tapes
outsell all others. Ask for a demonstration at
your dealer's today!

Schneider

CARL SCHNEIDER ROHRBACH-DARMSTADT 2

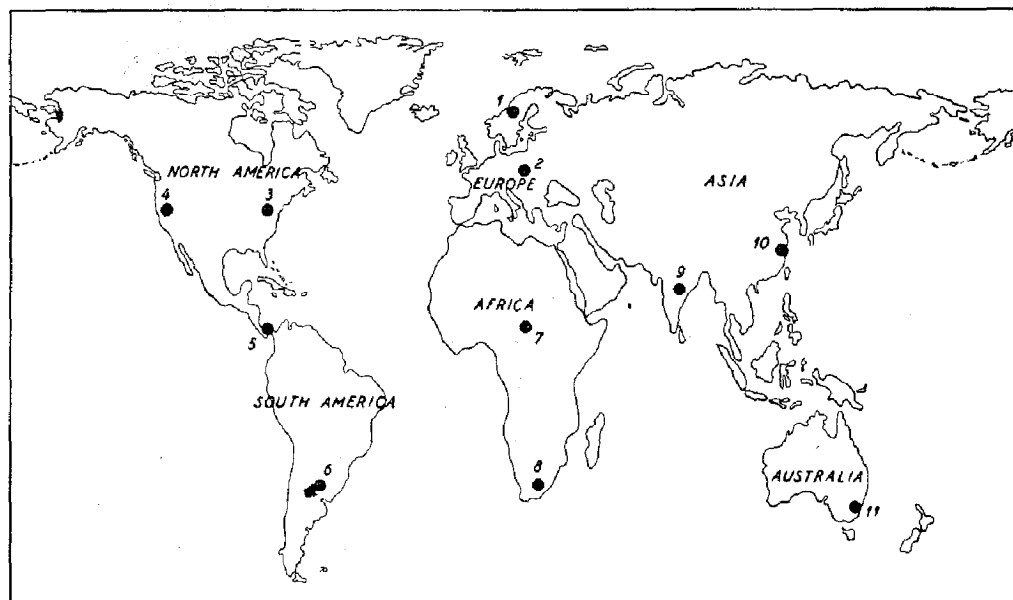

TABLE OF THE MOST SUITABLE METRE BANDS FOR BEST SHORT-WAVE RECEPTION IN EVERY PART OF THE WORLD AT VARIOUS TIMES OF THE DAY IN 1956.

Note: The figures in the table below are calculated for a specific point within each area as indicated on the chart below. The area numbers on the chart refer to the numbers indicated in the left-hand column of the table.

The figures in the table can be regarded only as average figures, as conditions will vary considerably from time to time due to irregularities in the ionosphere.

Example: A listener located in the eastern part of North America (area 3) wishes to hear a station in the southern part of Africa (area 8) on a January evening (21 local time). By following the horizontal column of figures starting at North America, East, on the left until it meets the vertical columns under the area no. 8 in the section for the months November, December, January and February on the right, he will come to the figure 41. This means that the 41 metre bands is the most suitable for listening to the required station at that time.

The listener's area	Local time	Area of the transmitting station

Here are just a few of the many NC-300 features

tuned to tomorrow

NATIONAL COMPANY, INC.

c/o Ad Auriema, 89 Broad St., New York, N. Y. U.S.A.

National

Features the greatest sensitivity of any ham receiver at any price (3-6 db noise figure on all amateur bands) plus . . . greater stability than most receivers costing up to \$695.

- Features a total of 10 dial scales for coverage of 160 to 1 1/4 meters with National's *exclusive* new converter provision with the receiver scales calibrated for 6, 2, 1 1/4 meters using a special 30-35 mc tunable IF band.
- Longest slide rule dial ever! More than a foot long! Easily readable to 2 kc without interpolation up to 21.5 mc.
- 3 position IF selector—.5 kc, 3.5 kc, 8 kc—provides super selectivity, gives optimum band width for CW, phone, phone net or VHF operation.
- Separate linear detector for single sideband . . . decreases distortion by allowing AVC "on" with single sideband . . . will not block with RF gain full open.
- Hi-speed, smooth inertia tuning dial with 40 to 1 ratio! Provides easier, more accurate tuning. Smoothest dial you've ever used.
- Exclusive optional RF gain provision for best CW results allows independent control of IF gain!
- Giant, easy to read, "S" meter!
- Provision for external control of RF gain automatically during transmitting periods.
- Muting provision for CW break-in operation.
- The newest look in ham receivers . . . "Massive in the modern manner" . . . truly a "dream receiver" that can be used either as a table or rack model!

01.30–04.30 to North America in German, English & French.

Three frequencies are used simultaneously during each transmission.

THE ACTIVITIES OF LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON IN BROADCASTING MATERIAL

The broadcasting materials manufactured by LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON cover longwave, medium wave and shortwave transmitters, the powers of which range from 50 watts to more than 400 kw. The reconstruction of the French broadcasting network after the war has been carried out almost entirely with C.F.T.H.-transmitters and especially the "Centre d'Allouis Shortwave Transmitters". Certain foreign countries have also been equipped with the same transmitters.

The Strasbourg-Selestat Central Broadcasting Transmitter, which was inaugurated in 1953, is for instance still and generally considered THE MOST MODERN STATION IN THE WORLD, thanks to the revolutionary "Vapodyne" system, prepared in 1950 by the Electronic Group of LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON.

This technique permits, in fact, to install 4×100 kW. transmitters (TH 755) together with all necessary units in a building of exceptionally reduced dimensions. These 4 transmitters can be used two at a time thus ensuring the simultaneous broadcasting of two different programmes with a power of 200 kilowatts.

The exceptional characteristics of this broadcasting station have been made possible by the employment of "VAPOTRONS", a new kind of transmission tubes with a filament of thoriated tungsten. Thus the yield of the installation is considerably increased (60%).

An original model, shown successively at the Milan Fair and at the French Exhibition at Montreal during 1954, and last, at the 1st international Exhibition of the Peaceful uses of Atomic Energy, at GENEVA, Aug. 5.-11. 1955, demonstrated how the enormous quantities of heat dissipated by these powerful tubes are evacuated into a boiler connected to a condenser. A considerable simplification is obtained by connection with the ordinary cooling systems (water or compressed air); on the other hand the evacuated heat can be recuperated for auxiliary purposes (heating of the building).

This ensemble, realised with standard accessories (boiler, level control reservoir, safety box, condenser) was the exact reproduction of a cooling installation for a "Vapotron" of 50 kw. It must be noted that the "Vapotron" can also be employed for other applications (highfrequency heating for instance) and especially for radiocommunication-transmitters.

At present LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON are constantly increasing their activities and realisations, among which there is reason to mention the following principal broadcasting transmitters, the installation of which has been entrusted to their organisation. These are to be found as well in the French Capital, and in the territories of the French Union (NORTH AFRICA - A.O.F. - INDOCHINE) as abroad:

ALGER (Algérie)	MONTPELLIER (la Blanquette I)
ALLOUIS (10 chaînes)	MONTE CARLO (Monaco)
ANDORRADIO (Andorre)	NANCY (Nomény I et II)
BARCELONA (Spain)	NANTES (Montbert I et II)
BEOGRAD (Yugoslavia)	NICE (La Brague III)
BORDEAUX (Néac I)	ORAN (Les Trembles I-II-III et IV)
BREST (Quimerch I et II)	PARIS (Romainville)
CLERMONT (Ennezat)	PARIS (Villebon)
CONSTANTINE (Algerie)	PRISTINA (Yugoslavia)
DAKAR (A.O.F.)	RABAT (Maroc)
DIJON (ville)	SAIGON (Indochina)
ENNEZAT (Puy-de-Dôme)	SARAJEVO (Yugoslavia)
FELSBERG (Sarre) OC et OL	SEBAA-AYOUN (Morocco)
GRENOBLE (ville I)	SKOPLJE (Yugoslavia)
LEOPOLDVILLE (Congo belge)	SAARBRÜCKEN (Saar)
LILLE (Camphin)	STRASBOURG (Sélestat I-II-III)
LIMOGES (Nieul II)	TANANARIVE (Madagascar)
LOUVETOT	TUNIS (Djedeida)
LYON (Tramoyes I et II)	TITOGRAĐ (Yugoslavia)
LJUBLJANA (Yugoslavia)	TRIESTE (Capo d'Istria)
MARSEILLE (Realtort I et II)	ZAGREB (Yugoslavia)
MONTBELIARD (ville)	Several regional stations

ACTIVIDADES DE LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON EN LA INDUSTRIA DE LOS MATERIALES DE RADIODIFUSION

Los materiales de radiodifusión manufacturados por LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON comprenden transmisores de onda larga, onda media y onda corta, cuyas potencias van desde 50 vatios hasta más de 400 kW. La reconstrucción de la red difusora de Francia fué realizada después de la guerra casi exclusivamente con las emisoras de C.F.T.H. y, sobre todo, con las emisoras de onda corta de »Centre d'Allouis«. Varios países extranjeros también han sido provistos de los mismos transmisores.

La estación central de radiodifusión de Estrasburgo-Selestat, por ejemplo, que fué inaugurada en 1.953 sigue siendo considerada comunmente LA ESTACION MAS MODERNA DEL MUNDO, gracias al sistema revolucionario de »Vapodyne« que fué elaborado en 1950 por el Departamento de Electrónica de LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON.

En realidad, esta técnica permite la instalación de cuatro transmisores de a 100 kW (TH.755) junto con todas las unidades necesarias en un edificio de dimensiones reducidas en extremo. Estos 4 transmisores pueden usarse por dos a la vez asegurando así la difusión simultánea de dos programas distintos con una potencia de 200 kilovatios cada uno.

Las características excepcionales de esta estación radiodifusora se han obtenido gracias a la aplicación de los »VAPOTRONS«, una nueva clase de válvulas de transmisión con filamento a tungsteno toriado. Por ello, el rendimiento de la instalación se aumenta considerablemente (en el 60%).

Un modelo original mostrado sucesivamente en el curso de 1954, en la Feria de Milán, en la Exhibición Francesa en Montreal y recientemente, en la Primera Exposición Internacional de la Aplicación de la Energía Atómica en los Afanes Pacíficos, en Ginebra, de 5. a 11. de 1955 del año en curso - ha mostrado como las enormes cantidades de calor disipadas por estas válvulas potenciales se evacúan a un hervidor conectado al condensador. Se obtiene una simplificación considerable por la conexión a los sistemas de refrigeración ordinarios (agua o aire comprimido); por otra parte, el calor evacuado puede recuperarse para objetos complementarios (la calefacción del edificio).

Este conjunto creado de accesorios normales (hervidor, recipiente de control de nivel, caja de seguridad, condensador) era la reproducción exacta de una instalación de refrigeración para un »Vapotron« de 50 kW. Debe observarse que el »Vapotron« puede servir también en otras aplicaciones (calefacción de alta frecuencia, por ejemplo) y sobre todo, para los transmisores de radiocomunicación.

Actualmente, LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON sigue aumentando sus actividades y realizaciones, entre las cuales vale mencionar las siguientes emisoras principales de radiodifusión, cuya instalación ha sido confiada a su empresa. Estas se encuentran tanto en el Metrópoli francés como por todas partes de la Unión Francesa (Africa del Norte - A.O.F. - Indochina) y el extranjero:

ALGER (Algeria)	MONTPELLIER (la Blanquette I)
ALLOUIS (10 cadenas)	MONTE CARLO (Monaco)
ANDORRADIO (Andorre)	NANCY (Nomény I y II)
BARCELONA (España)	NANTES (Montbert I y II)
BELGRADO (Yugoeslavia)	NIZA (La Braque III)
BURDEOS (Néac I)	ORAN (Les Trembles I-II-III y IV)
BREST (Quimerch I y II)	PARIS (Romainville)
CLERMONT (Ennezat)	PARIS (Villebon)
CONSTANTINA (Algeria)	PRISTINA (Yugoeslavia)
DAKAR (A.O.F.)	RABAT (Marruecos)
DIJON (Ville)	SAIGON (Indochina)
ENNEZAT (Puy-de-Dôme)	SARAJEVO (Yugoeslavia)
FELSBERG (Sarre OC y OL)	SEBAA-AYOUN (Marruecos)
GRENOBLE (Ville I)	SKOPLJE (Yugoeslavia)
LEOPOLDVILLE (Congo Belga)	SARREBRÜCK (Sarre)
LILLE (Camphin)	ESTRASBURGO (Sélestat I-II-III)
LIMOGES (Nieul I)	TANANARIVE (Madagascar)
LOUVETOT	TUNISIA (Djedeida)
LYON (Tramoyes I y II)	TITOGRAĐ (Yugoeslavia)
LJUBLJANA (Yugoeslavia)	TRIESTE (Capo d'Istria)
MARSELLA (Realtort I y II)	ZAGREB (Yugoeslavia)
MONTBELIARD (Ville)	Más varias otras estaciones

THE ACTIVITIES OF LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON IN TELEVISION MATERIAL

Television being a fore-runner in the technique of wave transmission and reception, it is natural to meet in the first rank LA COMPAGNIE FRANCAISE THOMSON-HOUSTON, which by the way also in numerous other fields of the electronic industries contributes largely to the reputation of the company for the construction of electrical equipment, of which it is doyen.

Already in 1937, when LA COMPAGNIE FRANCAISE THOMSON-HOUSTON delivered to the French Broadcasting Company their first equipment 455 lines, and when they exposed at the International Exposition in Paris, they had started experiments which permitted the construction of prototypes, which were later on largely utilized as well industrially as educationally.

The company occupies now an eminent place in this field. The activity of the ELECTRONIC GROUP is in fact lined with numerous results from 1939, in which year they constructed the first equipment for connection airplane-ground, till 1948, when an equipment 729 lines was presented on the occasion of the International Congress of Television. At the same time an experimental connection H.F. was erected between the Head Office and the building of the "Compagnie des Lampes", rue de Lisbonne in Paris. Finally can be mentioned from June and November 1952 the finishing of first the hertzian relay Paris-Lille (first relay in France and on the continent) and thereafter of a portable equipment with picture camera for the French Television (819 lines).

After delivery of another camera equipment (819 lines) to the "Service de Recherches et Contrôles Techniques" (S.R.C.T.), the Central Transmitter of Strasbourg was started in 1953. It was working for the first time on Christmas Eve and was officially inaugurated in January 1954 in this Alsatian capital, which is of so great importance in the European Organisation. The characteristics of the material supplied by LA COMPAGNIE FRANCAISE THOMSON-HOUSTON (taking-groups with several fully tele-commanded cameras, final regie, synchronizing-group etc.) make this second central transmitter the prototype for all French stations.

The year 1954 has confirmed the value of their technique. Successively this company has been entrusted with an important part of the construction of the Central Transmitters in Strasbourg, Marseille and Casablanca, and later on in Lorraine, in Normandy and in North Africa with high powered transmitters. It is also the Reporting Cars of La Compagnie Francaise Thomson-Houston, which enable the French Television to take the principal part of the reportings. Several other almost identical cars will in the course of this year complete the equipment of the R.T.F. In 1955 La Compagnie Francaise Thomson-Houston will also have constructed all the cameras used in the new studios of the Radiodiffusion Francaise, specially in their building in the rue Cognacq-Jay.

In the so-called industrial television, La Compagnie Francaise Thomson-Houston has in its experiments, developments and productions constructed an equipment of the highest quality, which has brought them the protection of the observers and a double economy of time and personnel. It is the only process permitting the sending immediately of a true picture from every possible surrounding and to numerous observers. The possibilities are unlimited: education, science, industry, commerce etc.

For the sake of information we may mention the satisfaction which was felt by the ELECTRONIC GROUP, when it was called upon in May 1953 and then again in the spring of 1955 to supply the technical equipment, which permitted the courageous enterprise of SUBMARINE TELEVISION of Corvette Capitain J.-Y. Cousteau on board the "Calypso". Furthermore we can inform that a big warehouse on the Right River Bank thanks to La Compagnie Francaise Thomson-Houston has able been to become the first in Europe to use the television as working instrument in the service of the customers (TELE-INFORMATION).

It is also La Compagnie Francaise Thomson-Houston, which has given technical help to the first "direct" televised presentation on the LARGEST SCREEN in Europe (6,50 m x 5,10 m) on the 3rd and 4th July 1954 (Salle Pleyel) of the final of the World Championship in Football, with more than five thousand people present.

Finally it was La Compagnie Francaise Thomson-Houston, which was approached by L'ADMINISTRATION DES PHARES ET BALISES when it was a matter of solving the new problems created by television in conjunction with radar. TELE-RADAR looks as though it may well become a kind of automatic direction - finder for ships, and be able to improve the precision and safety with which vessels are manoeuvred when entering or leaving harbours under conditions of bad visibility.

ACTIVIDADES DE LA COMPAGNIE FRANÇAISE THOMSON-HOUSTON EN LA INDUSTRIA DE LOS MATERIALES DE TELEVISION

Como la televisión anda a la cabeza del desarrollo técnico de la emisión y recepción de las ondas, natural es que encontremos aquí en el primer término a LA COMPAGNIE FRANCAISE THOMSON-HOUSTON, que hace, por lo demás, su aportación en gran escala en otros numerosos campos de las industrias electrónicas, a la reputación que gozan las compañías por su construcción de equipo eléctrico, en donde ocupa la primacía.

Ya en 1937, al entregar LA COMPAGNIE FRANCAISE THOMSON-HOUSTON su primer equipo de 455 líneas a la Compañía Francesa de Radiodifusión, y al presentar sus artículos en la Exposición Internacional de París, había iniciado los experimentos que la permitiera la construcción de prototipos que más tarde se utilizaran tanto en la industria como en la enseñanza.

Hoy en día la compañía ocupa un lugar preferente en este campo. En realidad, las actividades del Departamento de Electrónica han redundado en numerosos resultados desde 1939, año en que construyó su primer equipo para establecer contacto entre avión y tierra, hasta 1948, cuando se presentó un equipo de 729 líneas con motivo del Congreso Internacional de Televisión. Al mismo tiempo se estableció una conexión experimental entre su Sede Central y los edificios de la «Compañía de Lámparas» en rue de Lisbonne en París. Por fin puede mencionarse, entre junio y noviembre de 1952, la terminación del primer relé hertziano entre las ciudades de París y Lila (el primer relé en Francia y en el Continente), y además la construcción de un equipo portátil con cámara de imágenes para la Televisión Francesa (de 819 líneas).

Después de suministrar otro equipo de cámara (de 819 líneas) al «Service de Recherches et Contrôles Techniques (S.R.C.T.)», viene en 1953 la inauguración de la emisora central de Estrasburgo. Operaba por vez primera en la Nochebuena de 1953 y se inauguró oficialmente en enero de 1954 en la capital de Alsacia, que tanta importancia tiene en la organización europea. Las características del material suministrado por LA COMPAGNIE FRANCAISE THOMSON-HOUSTON (grupos de toma de escenas con varias cámaras de telemando perfecto, dirección final, grupo de sincronización, etc.) han hecho de esta segunda emisora central el prototipo de todas las estaciones francesas.

El año 1954 ha confirmado el alto valor de su técnica. Sucesivamente viene a confiarse a esta compañía una parte muy importante de la construcción de las Emisoras Centrales de Estrasburgo, Marsella y Casablanca y más tarde en Lorréna, Normandía y el África del Norte, con suministros de transmisoras de altas potencias. Son también los coches de reportaje de LA COMPAGNIE FRANCAISE THOMSON-HOUSTON que permiten a la televisión francesa hacer la mayor parte de sus reportajes. En el curso de este año, varios otros coches idénticos van a completar el equipo de la R.T.F. En 1955 LA COMPAGNIE FRANCAISE THOMSON-HOUSTON habrá construido también todas las cámaras usadas en los nuevos estudios de la RADIODIFFUSION FRANCAISE, sobre todo en su edificio de rue de Cognacq-Jay.

En materia de la llamada televisión profesional, LA COMPAGNIE FRANCAISE THOMSON-HOUSTON ha perfeccionado, gracias a sus investigaciones, desarrollos y diseños, un equipo de más alta calidad que se distingue por la protección del personal y la doble economía de tiempo y mano de obra. Es el único procedimiento que permite transmitir inmediatamente una imagen fiel desde cualquier sitio, a grandes distancias, y a numerosos observadores. Tiene un sinfín de posibilidades: Enseñanza, ciencia, industria, comercio.

En cuanto a la información rápida nos es grato manifestar la satisfacción que experimentó el Departamento de Electrónica cuando fué llamado, en mayo de 1953, y otra vez en la primavera de 1955, para suministrar el equipo técnico que ha permitido la audaz operación de TELEVISION SUBMARINA del Capitán de Corbeta J.-Y. Cousteau, a bordo del «Calypso».

Además, es la COMPAGNIE FRANCAISE THOMSON-HOUSTON que ha proporcionado la asistencia técnica para la primera presentación de televisión «directa» en LA MAYOR PANTALLA de Europa (6,50 x m 5,10 m) a 3 y 4 de julio de 1954 (en Salle Pleyel), cuando se combatió el Campeonato del Mundo en fútbol, a un público de más de cinco mil personas.

Por último, LA COMPAGNIE FRANCAISE THOMSON-HOUSTON ha sido llamada por la administración de faros y balizas de Francia para resolver algunos problemas nuevos que ha planteado la televisión combinada con el Radar: TELE-RADAR que parece ser una clase de conducción automática de los buques, susceptible de introducir una perfección en el servicio de seguridad y la eficacia de las maniobras de buques que entran y salen de puertos en tiempos de mala visibilidad.

SERVICE: Daily 16.00–16.45 in English and Spanish: 683 kc/s 439.2 m 1.25 kW.

ANNOUNCEMENTS: English: "This is Radio-Africa-Gibraltar". – Spanish: "Aquí Radio-Africa-Gibraltar".

INTERVAL-SIGNAL: Ship Siren.

VERIFICATION by QSL-card.

VHF/FM Sound Broadcasting Plans:

Ten stations are to be built in the first stage of the VHF/FM Sound Broadcasting scheme, eight in England, one in Scotland and one in Northern Ireland, together with a low power temporary Home Service station to serve a populous area of North Wales. At each permanent station six transmitters will be installed, two in parallel for each of the three programmes (Home Service, Light Programme and Third Programme) to be radiated. The first to be brought into service is at Wrotham, Kent, where two experimental transmitters were in use since 1950 until the regular three programme service started on 2nd May 1955. Pontop Pike and Divis will be the second and third to go into operation, and the other stations will be completed by the end of 1956. Details of frequencies to be used and the powers of the projected transmitters will be as follows: -

FM	Home Svc.	Light Prgr.	Third Prgr.	kW E.R.P.
Wrotham (Kent)	93.5	89.1	91.3	120
Pontop Pike (Newcastle)	92.9	88.5	90.7	60
Divis (Belfast, N. Ireland)	94.5	90.1	92.3	60
No. Hessay Tor (So. Devon)	92.5	88.1	90.3	60
Meldrum (Aberdeenshire)	93.1	88.7	90.9	60
Holme Moss (No. of England)	93.7	89.3	91.5	120
Sutton Coldfield (Birmingham)	92.7	88.3	90.5	120
Norwich (Norfolk)	94.1	89.7	91.9	120
Blaen Plwy (We. Wales)	93.1	88.7	90.9	60
Wenvoe (So. Wales)	94.3*	89.9*	92.1*	120

* Frequencies subject to confirmation.

STATIONS: Long and Medium Waves:

200 kc/s 1500 m 1295 kc/s 232 m
647 - 464 - 1340 - 224 -

The two columns below show the wavebands, which the BBC expects to use during the months from April to September and October to March. There will, however, be changes of both wavelengths and wavebands - sometimes of short notice - and listeners are advised to listen to announcements which will cover all such changes. Detailed wavelengths information can be obtained from the progr. journals.

FOR NORWEGIAN SEAMEN in the N. Atlantic and the N. Sea: Tromsø Short Wave Transmitter broadcasts daily the entire Home Sce. Progr.: In the morning on 9550 kc/s before and on 7210 kc/s after 16.00.

ANNOUNCEMENT: "This is R. Norway with its short wave service for Norwegians abroad".

INTERVAL-SIGNAL: Every s.w. transmission to Norwegians abroad is introduced by a Norwegian folk melody from Hallingdal.

Message to our English-speaking audience: In our daily special programmes for Norwegians abroad we will usually have a section of Norwegian music or music presented by Norwegian artists. This musical section, which lasts 15 to 20 minutes, is introduced in English as well as in Norwegian. On Wednesdays and Saturdays you can listen to our "Letter Box Programme", in which we play our listener's request records. We often receive letters from listeners in Norway with request to play a record with a greeting to one of their relatives abroad, but we regret to be unable to comply with these requests.

Every Sunday we have an additional programme in English, "Norway this week", in which we try to present Norway in different ways through music and feature programmes. We are very grateful for comments on our transmissions. Reports are answered by QSL-card. Return postage is not necessary. Our postal address is: RADIO NORWAY, Oslo, Norway.

INTERVAL-SIGNAL: When the station switches over from one direction to another a call signal of five different notes is played on a native instrument (Kisanzi) consisting of several vibrating iron bars attached to a wooden box.

Adv.

"RADIO BRAZZAVILLE" has now finished its "reconversion". The powerful station of the "FREE FRANCE", which gave hope to the oppressed peoples, has been substituted by an international French Voice, which is listened to and appreciated on all the continents.

For a Short Wave Station more than for any others it is indispensable to have contact with the listeners. Therefore we are very happy to receive listening reports, programme critics, suggestions etc. etc., which come to us. Our goal is to make radio for the listeners. Only they count after all, whatever nation they belong to, or whatever language they use. In French, in English, in Portuguese or in Spanish, in 19 information broadcasts, we do our very best to circulate as soon as possible interesting and objective news. These two rules of speed and objectivity have given us the confidence of a very large number of listeners, and we are proud of this. In the artistic domain, we have varied the programs as much as possible, giving a big part to French culture. Classical music, which is so often demanded, is often presented in our programs, which will, however, also allow room for the imagination. Finally we have our programs with "records wanted" (listeners' international concert) presented in 4 languages, which permits you – wherever you live – to make friends and relatives – wherever they live – listen to the records of your choice. Do not forget that RADIO-BRAZZAVILLE replies to all letters; you may verify this by writing us. And now: Good listening.

VERIFICATION by letter or QSL-card. Return postage required. Answers to listeners letters are also given during the Sunday request prgr.

FUTURE PLANS: R. A. E. F. to be increased to 25 kW & stations planned to broadcast in the tropical bands.

PUBLICATION: A fortnightly programbulletin.

MANILA BROADCASTING COMPANY (Pr. Comm.)

ADDRESS: 7th Floor, Insular Life Building, Manila.

LEADING PERSONALITIES: Pres.: F. Elizalde. Executive Vice-Pres.: W. J. Dunn. Sales Man.: I. Davis. Dir. Tec.: J. M. Palmer. Secretary for Engineering Dept.: Dolores D. Mendoza. Station Man.: H. D. Bowie Jr.

The following stations are owned by the Manila Broadcasting Company. These stations operate on the same schedule throughout the year. One hour each day is devoted to Chinese language broadcast. The remaining time is divided approximately fifty-fifty between English language and local Philippine dialects. The only exception to the above being that there is one fifteen-minute newscast in Spanish language. In the following listing all s.w. frequencies grouped with a broadcast frequency carry simultaneously the same progr. as the broadcast station.

THE VOICE OF THE PHILIPPINES: 21.00-15.00.

GERMANIUM CRYSTAL DIODES

are indicated here because...

The use of the Germanium Diode is now firmly established in current T/V practice—and indeed for Radio and Electronic equipment. The glass sealed type is recognised everywhere as being the most reliable and of the highest possible quality.

The design of the G.E.C. Germanium Diode was perfected over three years ago, since when no major alteration has been necessary. There is already a large range of types available, but this is continually being enlarged, and types are now obtainable that were previously restricted essential industries.

Type	Description	List Price
GEX 35	T/V vision detector	6/-
GEX 44/1	T/V sound detector and limiter	7/6d.
GEX 45/1	General purpose diode	10/-
GEX 55/1	High back resistance diode	16/-
GEX 54	High back resistance diode	£1.0.0
GEX 54/3	100 V diode	£1.5.0
GEX 54/4	150 V diode	£1.10.0
GEX 54/5	200 V diode	£1.15.0
GEX 66	100-1000 Mc/Sec Mixer	12/6d.
GEX 64	Telephone modulator	£1.0.0
GEX 34	Set makers version of GEX 44/1	—

They are of small size, low capacitance, and high forward conductance.

Being so small, they can be soldered directly into the part of the circuit where they are wanted.

Heater wiring and valve holders are not required, and they can be tried with great ease in various circuit arrangements.

The crystals are hermetically sealed in glass, making penetration by characteristic-destroying moisture impossible.

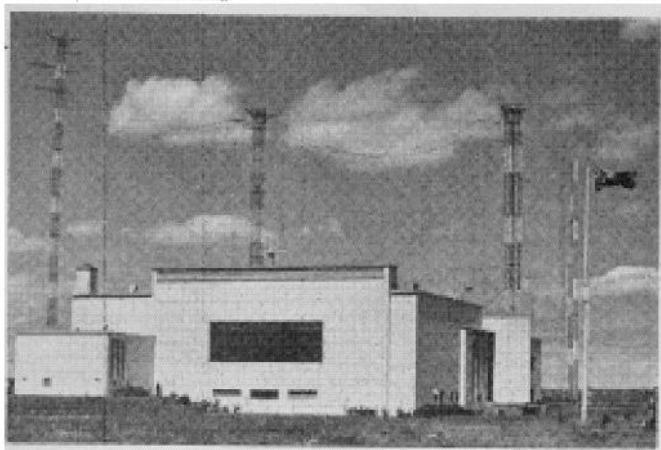

A minimum life of 10,000 hours means that they need not be easily accessible for replacement.

Data on specific types for special applications is available on request from the Osram Valve and Electronics Dept.

UNITED STATES OF AMERICA

VOICE OF AMERICA (Govt.). Continental USA.

"THE VOICE OF AMERICA" is operated by the Broadcasting Service of the U.S. Information Agency. The VOA seeks to promote an increased understanding of the United States among the peoples of the world and to strengthen cooperative international relations.

VOA radio relay installations are located at Honolulu, Manila, Colombo, Okinawa, Munich, Tangier, Salonika and aboard VOA's floating transmitter - the U.S. Coast Guard Cutter COURIER. Relay facilities are also leased from the BBC.

Programs are written, produced and broadcast from studios in Washington, D.C., New York City and Munich, Germany.

ADDRESS: The Voice of America, Washington 25, D.C., USA.

LEADING PERSONALITIES: Director, U.S. Information Agency: Theodore C. Streibert. Assistant Director for Broadc. and Television: J. R. Poppele. Prgr. Manager: Gene King. Chief Engineer: Edgar T. Martin. Facilities Manager: Harold O. Wright.

RELAY STATIONS: For frequencies of the relay stations, refer to the individual countries: Germany, Greece, Dodecanese Islands, Great Britain, Tangier, Ceylon, Hawaii, Okinawa, Philippines.

ANNOUNCEMENT: Each program ends with these words spoken in English: "This program has come to you from the United States of America." The station identification is then announced in English.

VERIFICATION: By QSL-card. No return postage required.

"HOW TO LISTEN TO THE WORLD"

- extended and improved - will be published approx. February.

Price D. Kr. 3.75, £ 0/4/9, \$50 cts. (+ transport D. Kr. 0.50).

World Radio Handbook, Lindorfsalle 1, Hellerup, Denmark.

U.S.A.

ARMED FORCES RADIO and TELEVISION SERVICE

ADDRESS: Office of Armed Forces Information and Education, Washington 25, D. C.

This office exercises overall policy control of the Armed Forces Radio and Television Service. The mission of AFRTS is to keep United States service men and women stationed outside the States the best informed service personnel in the world on current events. All broadcasts are in English. Entertainment and educational programs go out in disc form, to be broadcast to local military audiences by 69 armed forces radio stations in overseas areas. News, sports and other timely matter is beamed overseas directly by twelve powerful transmitters on the U.S. Atlantic and Pacific coasts. These shortwave broadcasts serve both the overseas radio stations, which relay them locally, and the more remotely situated individual military listeners with their own shortwave radio receivers. Programmes other than news and locally produced programmes are derived directly from the U.S. Commercial Networks. News is compiled directly from the wires of A.P., N.P. and JNS.

AFRTS presents regular shortwave programmes from both Los Angeles and New York City, using the transmitters of the Voice of America.

EUROPEAN SERVICE (from New York)

ADDRESS: Officer in Charge, Armed Forces Press, Radio and Television Service, 641 Washington Str., New York 14, N.Y.

Adv.

ONDAS DEL LAGO is 10 years ahead of the venezuelan radio transmission thanks to its updatate and powerful sender as also its wonderful antenna in the very lake of Mara-caibo. ONDAS DEL LAGO which is always leading in every radio transmission, occupies its own modern radio- and televi-sion centre in the most suitable and desirable location in the new area of the city covering 4000 sq. meters and out of which the 2400 sq. meters are edificed and equipped with the most updatate technical exigencies. ONDAS DEL LAGO covers the entire territory of the nation and the message of the advertisers reaches the most distant as also the most im-portant markets of Venezuela.

World Radio Handbook, Lindorffsallé 1, Hel-lerup, Denmark.

WORLD TELEVISION

The principal television systems:

Definition refers to the broadcast standard which is normally stated in terms of the number of lines which make up the image. Reference in the following surveys is made throughout merely to 405 lines, 525 lines, 625 lines (CCIR*), 625 lines (Sovjet**) and 819 lines respectively.

Details of these five definitions are given in the following table:

	Systems			
Number of lines per picture	405	525	625*	819
Video bandwidth (Mc/s)	3	4	5	10.4
Channel width (Mc/s)	5	6	7	14
Sound carrier relative to vision carrier (Mc/s)	-3.5	+4.5	+5.5	-11.15
Sound carrier relative to edge of channel (Mc/s)	0.25	-0.25	-0.25	+0.10
Interlace	2/1	2/1	2/1	2/1
Line frequency (c/s)	10,125	15,750	15,625	20,475
Field frequency (c/s)	50	60	50	50
Picture frequency (c/s)	25	30	25	25
Sense of vision modulation	Positive Negative Negative Positive			
Level of black as percentage of peak carrier	30	75	75	25
Sound modulation	AM	FM	FM	AM

*) The International Radio Consultative Committee.

**) The characteristics are the same as 625 lines CCIR exc. for a difference in bandwidth: video bandwidth 6 Mc/s, channel width 8 Mc/s, sound carrier relative to vision carrier +6.5 Mc/s.

The following pages give you the data of the different TV stations of the world. The channel is indicated by a letter followed by a figure. The letter indicates the technical data of the systems which are in use (A: America, B: British etc.) and the figure is the channel number. The powers for vision and sound are indicated by a fraction, the numerator indicating the number of kW (ERP) for vision and the denominator for sound, for example 6/1.5 means vision, 6 kW ERP and sound 1.5 kW ERP...

GERMANY

GERMAN FEDERAL REPUBLIC

Television has been developed by the various radio organizations (Rundfunkanstalten) and particularly the Nordwestdeutscher Rundfunk. - A common prgr. is being broadcast throughout Germany under the title "Deutsches Fernsehen". Each of the organizations participates in the production of this prgr. In addition a number of regional broadcasts are transmitted by each of the broadcasting organizations.

Relay Facilities for the German television network are constructed by the German postal authorities:

1) Hamburg-Köln with intermediary transmitters at Hannover and Langenberg, a link which uses eight relay towers.

2) a special pick-up at Hamburg for broadcasts to and from Berlin and their relay to and from Hamburg.

3) Continuation of the Hamburg-Köln link to Frankfurt, Stuttgart, Munich and Baden-Baden.

Community television prgr. daily approx.: W. 15.30-16.30, 18.00-18.30, 19.00-21.30. Sun. 11.00-11.30, 13.00-15.00, 19.00-21.45. Testtransmissions approx.: 09.00-10.00, 16.30-18.00.

ADDRESS: Fernseh Kommission der Arbeitsgemeinschaft der Westdeutschen Rundfunkanstalten, Hessischer Rundfunk, Frankfurt a/M.

NORDWESTDEUTSCHER RUNDFUNK

At the beginning of 1956 Nordwestdeutscher Rundfunk (NWDR) will be replaced by two organizations: Westdeutscher Rundfunk, Köln, Wallrafplatz 5, and Norddeutscher Rundfunk, Rothenbaumchaussee 132/134.

ADDRESS: Gazellenkamp 57, Hamburg-Lokstedt. - **LEADING PERSONALITIES:** Intendant: Dr. Werner Pleister. Dir. Prgr.: Heinz von Plato. Chief Editor: Werner Krüger. Dir. Plays: Hanns Farenburg. Dir. Adm.: Hans-Joachim Hessling. Dir. Tec.: Dr. Walter Schwarz. Chief of Press and Information: Klaus Mahlo.

PORTUGAL

EMISSORA NACIONAL DE RADIODIFUSAO (Govt.)

The National transmitter has been carrying out tests for the past two years with a view to the introduction of a television service in Portugal. These tests have been investigated by a commission, which has recommended that the Government should introduce television into Portugal as soon as possible. - The first step will be to serve the most thickly populated districts in Lisboa, Oporto and Coimbra, which possess about half the inhabitants in the country. - Operation will be partly commercial. - Lisboa is to be the main prgr. station. - All stations will transmit the same prgr. - An international link (Lisboa-Madrid) with Eurovision is under construction. -

Projected Stations:
 Lisboa ch. E7 250/120 kW - Porto E5 120/60 kW - Centro vision 44 mc/s, sound 49.5 mc/s 90/45 kW evt. ch.-band III.

MESSAGES TO WHR ON THE OCCASION OF ITS TENTH ANNIVERSARY

(Continued from page 15)

RADIOCLUB OF BENGUELA, ANGOLA

In view of the fact that World Radio Handbook is celebrating its tenth anniversary, it gives Radio Club of Benguela extremely great pleasure to express its satisfaction at the success achieved by this most useful and interesting publication, which has proved to be an intelligent and courageous champion of an instrument for making still stronger and more sincere the bonds that should unite all peoples in a common understanding for the preservation of a world in peace on the road towards further enlightened tasks for the good of mankind.

With hearty greetings from The Radio Club of Benguela.

Gastao Vinagre, Director General.

(Continued next page)

DIRECCION GENERAL DE RADIOCOMUNICACIONES, BOLIVIA

On behalf of my Administration I congratulate you on your work and completely agree with Mr. Wallenborn, Secretary General of the European Broadcasting Union, concerning the importance of the handbook in question.

Manuel Q. Daza Valda, Director General.

"HAPPY STATION" - RADIO NEDERLAND, HOLLAND

"World Radio listening without a World Radio Handbook is much like using a telephone without a telephone book. Mostly wrong numbers. Having a telephone book means dialing the right number — — WRH the right station.

Edward Startz, The "Happy Station" Programme.

THE MINISTRY OF INFORMATION, BROADCASTING DEPARTMENT, REP. INDONESIA

On the occasion of the tenth anniversary edition of the World Radio Handbook, we find it necessary to say a few words about the W.R.H.: W.R.H. has proved to be a splendid tool, not only to all radio listeners but also to all stations throughout Indonesia. — Going through the W.R.H., no doubt one will realise that you Mr. O. Lund-Johansen have got through a lot of work to compose such an excellent radio guide-book, which at the same time serves as a means to bring about unity and understanding among all nations and peoples all over the world. — We and together with us all Indonesians sincerely congratulate you with the tenth edition of W.R.H. and share this joy with you.

The Ministry of Information Broadcasting Department

G. de Wilde, Chief Technical Services.

IMPERIAL GOVERNMENT OF IRAN

"We find your publication very comprehensive and useful and have received numerous letters from all over the world referring to your book".

Dr. Mohsen Rahnama, Director General.
Dept. Information and Broadcasting.

JAMAICA BROADCASTING COMPANY

We have found the World Radio Handbook of considerable use to us from time to time. We believe that it has made a valuable contribution to international co-operation and goodwill between Radio-stations throughout the world.

W. MacLurg, Managing Director.

RADIO NEPAL

You have indeed done a great task by publishing regularly the World Radio Handbook. The value of the book to listeners as well as broadcasting organizations is immense and I wish you every success in your efforts to keep the book most up-to-date.

K. B. Khatry, Superintending Engineer

ONDAS DEL LAGO, VENEZUELA

A new stage forward, a fresh step towards the final goal: understanding between all the peoples of the earth—that means the tenth jubilee edition of WRH, which for a decade of incessant struggle in which difficulties have alternated with success, have been able to keep the light burning for all citizens of the world, who value peace, freedom and community feeling—firm bastions defending stable happiness.

There is no doubt that after these unhappy years of struggle and distress, these frightful years of war and hate, the world greatly needed an instrument, a work of WRH's character, when commencing the difficult work of re-construction and understanding between peoples, who formerly regarded each other with suspicion. World Radio Handbook and our good friend Lund Johansen have seen their great efforts crowned with success. No easy triumph as some might think—in fact we can only judge the result, when we consider all the difficulties that have had to be faced. For this reason and in view of what WRH means for all the citizens of the world, with their various races and ideologies, we promise now, as we have done in the past and will do in the future, our moral support to Mr. Lund-Johansen, whom we assure of our permanent gratitude and sympathy.—WRH faces a promising future. The harvest is beginning to bear fruit.

Henrique Ascanio Buroz, Director General.
